

Confirmation

Grade: 603 Rodena LK – wet strength

A result of the used raw material and the additives is, that the paper of the Grade 602 is suitable for composting and 100% biodegradability.

We confirm:

- Biodegrade break down into carbon dioxide, water, biomass at the same rate as cellulose (paper)
- Disintegrate the material is indistinguishable in the compost, that it is not visible and needs to be screened out
- Eco-toxicity the biodegradation does not produce any toxic material and the compost can support plant growth.
