Rev. A

Indications for Use: Exact Medical Manufacturing Transducer Probe Cover can be used to minimize contamination between patient and ultrasound probe during ultrasound scanning procedures for external intact skin. This may help with easier cleaning and disinfection of the probe. This product is not intended for use of probes with endo cavity or intraoperative use. The Exact Medical Manufacturing Ultrasonic Transducer Cover are also sold as bulk non-sterile, single use items, to repackager/relabeler establishments for further packaging and ethylene oxide sterilization.

Instructions for Use: Caution: This product is not intended for use of probes with Endo cavity or intraoperative use.

1. Read accompanying coupling gel instructions. (If Applicable)
2. Use aseptic technique.
3. Probe Cover is telescope folded to allow for easy insertion of transducer probe. Insert transducer probe into cover making certain to locate the transducer probe scanning face against the distal end of the probe cover interior. Pull the probe cover over the transducer probe until fully extended.
4. Apply some gel to application area. After application dispose of sachet to prevent re-application. See coupling gel instructions.
5. Fixate the probe cover with provided elastic bands. (If Applicable)
6. Make certain there are no air bubbles under the probe cover.

Acoustics Performance Values:

- Speed of sound emitted: 1,698 m/s
- Density: 0.960 g/cm3
- Acoustic impedance: 1.63 MRayl
- Attenuation coefficient: 81.74 dB/cm
- Attenuation: 0.51 dB
