1 Product description

Intended purpose

Lumbamed® sacro is a brace for stabilisation of the pelvis.

Indications

All indications requiring stabilisation of the pelvis, such as:
• Sacroiliac joint dysfunction
• Sacroiliac joint instability
• Muscle pain and tendon disease in the pelvic region
• Pelvic ring instability
• For recurring muscle and tendon disease (rectus abdominis muscle, piriformis muscle)

Contraindications:

None known at present.

Risks / Side Effects:

If the aids are too tight, this can cause local pressure sores or constriction of blood vessels or nerves. Therefore you should consult the doctor treating you before you use it if the following circumstances apply to you:

- Condition or injury of the skin in the area of application, particularly with infectious indications (excessive heat, swelling or reddening)
- Paraesthesia and circulatory disorders (e.g. as seen in diabetes, varicose veins)
- Lymph drainage disorders – equally, swelling of soft tissue adjacent to the area of application which is not related to a condition

When wearing snug-fitting aids, this can result in localised skin inflammation or irritation that is due to mechanical irritation of the skin (particularly in conjunction with sweating) or due to the composition of the material.
